OBJECTIVE

Our team has been commissioned to select a New Jersey non-profit organization to which the board of directors of our company will donate one million dollars.

The board of directors will vote in favor or against our team proposal.

PROJECT

The support to community organizations, the allocation of donations to social institutions and the spreading of the principles of the company to the people of the environment, are some of the actions that demonstrate the value that each company provides to the community.

Donations are a fundamental element in many projects, especially if the resources allocated are for the help and welfare of the community

WHY ARE DONATIONS NECESSARY?

- Your donation transforms lives.
- It is a simple and safe act. To support these actions, there are already foundations that ensure the quality of their exercise, as well as their arrival to the exposed recipients.
- Help people who really need it.
- It is a social commitment. When people donate money or other goods, they reinforce, in turn, the social commitment.
- Personal satisfaction. Some lives will be present thanks to you.

TEAM'S DECISION MAKING PROCESS

Our group chose to support the cure of childhood diseases. Childhood diseases are common, because they are characterized by their rapid transmission from one child to another. Unfortunately, today, many children suffer from cancer and we all know that facing these medical expenses is very expensive. For that reason our idea is to support a help center for children with cancer.

St. Jude
Keeton

WHICH COMPANY?

The company that will accomplish our objectives, and will benefit the most from a million dollars donation is St. Jude Children's Research Hospital.

St. Jude Children's Research Hospital

We have chosen a Children's Research Hospital of St. Jude as the organization to invest. St. Jude is leading the way the world understands, treats and defeats childhood cancer and other life-threatening diseases. One of the main reasons to support this foundation is because St. Jude has treated children from all 50 states and around the world. It was founded primarily by private donations, and thanks to the generosity of donors, families do not receive any invoices from St. Jude. St. Jude's approach is different from most children's hospitals, because they only want families to focus on helping their children live.

WHY WE SHOULD SUPPORT ST. JUDE

Because St. Jude is leading the way the world understands, treats and defeats childhood cancer and other life-threatening diseases.

Families never receive a bill

Families never receive a bill from St. Jude for treatment, travel, housing or food – because all a family should worry about is helping their child live.

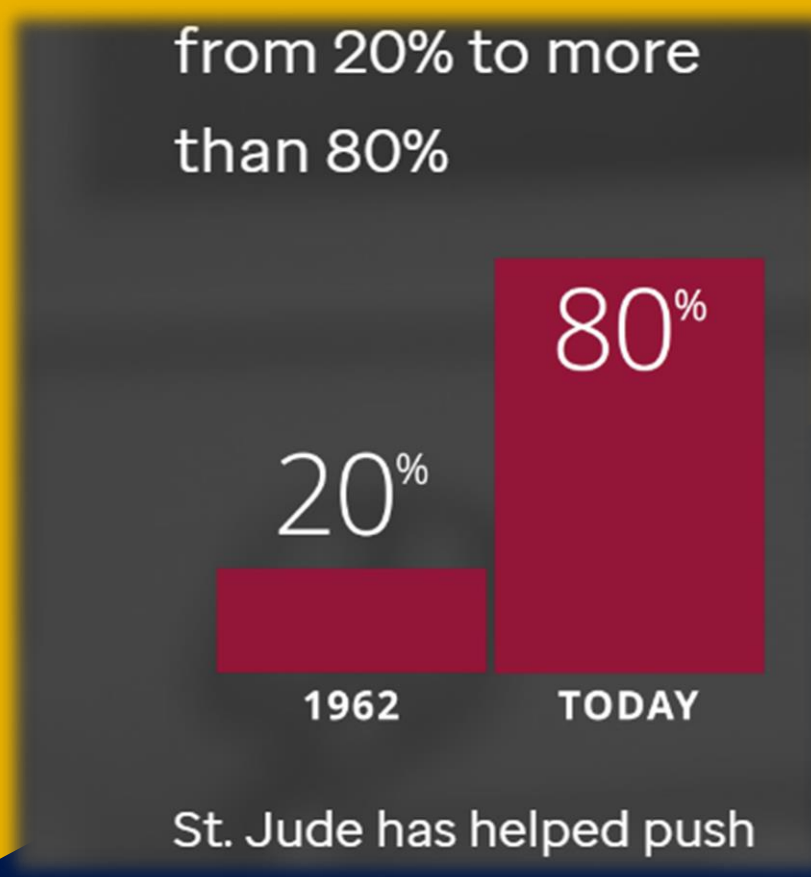

More than 75% of operating costs must come from generous donors

It will cost approximately \$1 billion to operate St. Jude this year. Because more than 75% comes from generous donors, St. Jude has the freedom to focus on what matters most – saving kids regardless of their financial situation.

The founder of St. Jude believed that “No child should die in the dawn of life,” and people have spent more than half a century focusing on the hospital’s mission: Finding Cures. Saving Children.

The background of the slide features a photograph of the St. Jude Children's Research Hospital building. In the foreground, there is a bronze sculpture of four children running. A large, semi-transparent white circle is overlaid on the left side of the image, containing the text. The hospital's name and logo are visible on the building facade in the background.

MISSION AND VISSION

The mission of St. Jude Children's Research Hospital is to advance cures, and means of prevention, for pediatric catastrophic diseases through research and treatment. Consistent with the vision of our founder Danny Thomas, no child is denied treatment based on race, religion or a families ability to pay.

OBJECTIVES OF ST. JUDE

- Support clinical investigators by providing assistance in developing high quality clinical protocols.
- Provide a centralized clinical registration system.
- Perform ongoing routine monitoring of St. Jude investigator initiated clinical trials at St. Jude and at collaborating institutions.
- Participate in the design and development of case report forms and data entry screens.
- Provide administrative oversight for scientific review of clinical research studies (CT-SRC).
- Ensure completion of required institutional and Federal reviews to accruing participants.
- Provide investigational pharmacy support, including standard order sets for therapeutic protocols.

SERVICES PROVIDED

- Protocol development, review, and activation
- Centralized research participant enrollment
- Monitoring the conduct of research
- Investigational studies pharmacist services
- Clinical research support for regional affiliates
- Support for Collaborating Study Sites
- Clinical Research contract negotiation and disbursements
- Clinical Research Education
- Administrative support for the CT-SRC

ST. JUDE LIFE & AFTER COMPLETION OF THERAPY CLINIC

The ACT clinic is designed especially for long-term survivors of childhood cancer who were treated at St. Jude. Each person is eligible to transfer to the ACT Clinic once they have remained cancer free for at least two years after discontinuing therapy, and at least five years have passed since their diagnosis. You will visit the clinic once a year until your 18th birthday or up to 10 years after your last cancer treatment, whichever comes later.

Research Hospital[®]
Finding cures. Saving children.

DURING YOUR VISIT

During your visit, you will have a complete check-up and fill out a questionnaire. The ACT Clinic doctors and staff will:

- Do tests to confirm that you are still in remission (cancer-free).
- Check for late health problems (“late effects”) related to cancer therapy.
- Tell you about your cancer history and health risks after treatment.
- Help you adjust to life as a survivor.
- Give advice about ways to stay healthy after cancer treatment.
- Help you find the health care providers and services you need in your community.

MAKING AN APPOINTMENT

You will automatically receive your first appointment card in the mail several months before your scheduled visit to the ACT Clinic.

To check or change the date of your appointment, please call **901-595-4680** Monday through Friday, 9 a.m.–4 p.m. Central time. If you are outside the Memphis area, dial toll-free **1-866-2STJUDE** (1-866-278-5833), extension 4680.

A group of approximately 15 staff members are posed around large, 3D block letters that spell out 'ACT'. A large white heart is positioned behind the letters. The staff members are dressed in professional attire and are smiling. The background shows a modern office environment with large windows and colorful wall art.

ABOUT THE ACT CLINIC AND STAFF

The ACT clinic is the largest long-term follow-up clinic for childhood cancer patients in the United States. It serves as a model for other cancer follow-up programs around the world. Today, we are following more than 5,000 survivors who received treatment for childhood cancer at St. Jude.

The ACT Clinic team includes doctors, nurse practitioners, nurses, social workers, and psychologists. We have special training and expertise to help cancer survivors just like you.

CONCLUSION

Thanks to donations

Fortunately, 75 percent of St. Jude's daily expenses are covered by contributions. With this, St. Jude can continue to develop cures to save sick children around the world.

Donate with payroll deductions

Donations can be made directly deducted from the payroll of each donor. Only the donation form must be presented to the employer.

A different hospital

Only 12 percent of the money to operate the hospital comes from charges to insurers. This is completely different from most hospitals, which can generate more than 90 percent of their income, by insurance payments and other sources.

Resources to develop new cures

Over the past five years, an average of 83 cents of every dollar received has sustained research and treatment at St. Jude.
